INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 70300-0106WO	FOR FURTHER ACTION	See item 4 below
International application No. PCT/US2005/003465	International filing date (day/month/year) 07 February 2005 (07.02.2005)	Priority date (day/month/year) 05 February 2004 (05.02.2004)
International Patent Classification (8t See relevant information in Form I	h edition unless older edition indicated) PCT/ISA/237	
Applicant ADHESIVE TECHNOLOGIES, INC	C	

1.	 This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a). 			
2.	 This REPORT consists of a total of 5 sheets, including this cover sheet. In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead. 			
3.	This report contains indications relating to the following items:			
	Box No. I	Box No. I Basis of the report		
	Вох №. П	Priority		
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability		
	Box No. IV	Lack of unity of invention		
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
	Box No. VI	Certain documents cited		
	Box No. VII	Certain defects in the international application		
	Box No. VIII	Certain observations on the international application		
4.	4. The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis.2).

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US05/03465

Box No.	. I Basis of this opinion
1. With reit was	egard to the language, this opinion has been established on the basis of the international application in the language in which filed, unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With a	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the d invention, this opinion has been established on the basis of:
a.	type of material
	a sequence listing
	table(s) related to the sequence listing
b .	format of material
	in written format
	in computer readable form
c.	time of filing/furnishing
	contained in international application as filed.
	filed together with the international application in computer readable form.
	furnished subsequently to this Authority for the purposes of search.
3. 🗌	In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additi	onal comments:

2. Citations and explanations:

Claims 1-8 and 10 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the gripper mechanism disengaging completely from the plunger to allow the plunger to move away from the cartridge upon release of pressure from the trigger, in combination with the other limitations set forth in claim 1. The prior art of record discloses various triggeractuated plunger acting upon a cartridge to dispense fluid materials. However, the gripping mechanism either remains engaged or partially engaged to the plunger upon release of pressure from the trigger; or, if there is complete disengagement at some point, it is not due to release of pressure from the trigger, but is a result of some other mechanism disengaging the gripping mechanism from the plunger.

Claims 1-8 and 10 meet the criteria set out in PCT Article 33(4), and thus has industrial applicability because the subject matter claimed can be made or used in industry.
